Measuring progress on patient safety policies including prevention and control of healthcare associated infections at EU level

Health First Europe (HFE) has developed 11 policy indicators to measure progress on improving patient safety including prevention and control of healthcare associated infections at EU level.

These indicators aim at guiding the debate on how to achieve better standards regarding patient safety, anti-microbial resistance and healthcare associated infections in Europe.

HFE is currently measuring progress on patient safety policies in EU Member States.
France

POLICY INDICATOR

1. MEMBERSHIP IN HAI-NETWORK (ECDC)
   - Q1 Q2 Q3 Q4

2. PATIENT SAFETY POLICY
